VISION

General Trias is a dynamic progressive town, a center of sustainable industry and modern agricultural trends, where God-fearing, competitive, disciplined and united people live in a safe and healthy environment with sufficient infrastructure facilities led by quality-oriented and responsible leaders.

MISSION

The Municipal Administration shall provide good governance while ensuring sustainable development and providing basic-economic service.
I am greatly humbled by the privilege of presenting this report ... fully aware that everything that transpired in the municipal government for the past 100 days have been accomplished because of the hard work and cooperation of the municipal workforce and active involvement of our constituents, with whom I have the honor to serve.

Inspired by our new vision, the first 100 days of my third term in office focuses on a holistic approach centered on the five areas of governance defined in the Executive-Legislative Agenda Formulation.

For more than 6 years now, this administration has been striving to maintain a balance achievement in all aspects of government service and address if not all, at least the very basic needs of its citizenry. Much have been realized, achieved and accomplished, but I believe this doesn’t stop us from wanting more and dreaming big for our beloved town.

We have set a new vision, we have targeted new goals and with one vision I encourage all Gentriseños to help your local government in turning this vision into a reality. I call on all concerned agencies, organizations, private entities and individuals to continuously support this administration in its endeavor of implementing good governance while ensuring sustainable development and providing basic economic services to its people.

As my usual battle cry goes, Let's Join Forces in giving all the best for General Trias.
